
KILMORE CREEK PRECINCT LANDSCAPE MASTER PLAN (CONT.)

9 DEVELOPMENT AND INFRASTRUCTURE

9.1 KILMORE CREEK PRECINCT LANDSCAPE MASTER PLAN

Author: *Paul Bezemer - Senior Strategic Planner*

File No: *PL/13/082*

Attachments: 1. *Kilmore Creek Consultation Report*

SUMMARY

The purpose of the Kilmore Creek Precinct Landscape Master Plan (Master Plan) is to highlight the importance of the Kilmore Creek precinct for the town and provide a vision to guide future landscape improvements and land management practices to improve the Creek's natural environment and activation.

The draft Master Plan was placed on exhibition from 6 September until 7 October 2019. Fifteen (15) submissions and seven (7) online surveys were received in addition to approximately 45 people attending a drop-in session. Where appropriate, the feedback received has been used to inform the finalisation of the Master Plan, it is recommended that the Master Plan now be endorsed.

Following endorsement, Council officers will prepare an implementation strategy around the identified three (3) priority projects and other actions to inform the future capital works program and external funding applications.

RECOMMENDATION

THAT Council:

1. Endorse the Kilmore Creek Landscape Master Plan (circulated separately)
2. Prepares an implementation strategy for the Master Plan to inform future Council budgets and external funding opportunities.

BACKGROUND

Council obtained grant funding of \$50,000 from the Department of Economic Development, Jobs, Transport and Resources (DEDJTR) to prepare a landscape master plan for the Kilmore Creek precinct.

The preparation of this Master Plan follows extensive strategic planning work undertaken through the Kilmore Structure Plan that envisages the peri-urban town of Kilmore growing to a population of over 20,000 people. The Kilmore Structure Plan identified the preparation of a landscape master plan for the Kilmore Creek as an action and envisaged the Creek corridor being the primary linear open space corridor through the township.

KILMORE CREEK PRECINCT LANDSCAPE MASTER PLAN (CONT.)

Kilmore Creek Precinct Landscape Master Plan

The Master Plan sets out the following vision to guide future landscape improvements and land management practices within the precinct:

“The Kilmore Creek Precinct will be the primary recreational open space and environmental corridor in Kilmore. It will improve amenity and accessibility, and create an interconnected spine to support the heart of the town and form a vibrant community space for residents and regional visitors” (p. 39).

The implementation of this vision will be directed by actions and recommendations outlined under the following seven (7) guiding principles:

- Open Space Systems
- Access and Movement
- Cultural Heritage
- Drainage and Flooding
- Biodiversity and Environment
- Built Form
- Land Management

The actions and recommendations range from encouraging water sensitive urban design and integrated water management principles for surrounding land to the delivery of additional infrastructure such as new bridges and wayfinding signage. It is envisaged that these actions would be delivered over time as it will require significant funding and officer time.

The study area for the Master Plan commences at Willowmavin Road to the north extending south along the creek corridor to Green Street, then extending across the eastern tributary to Wandong Road and along the western tributary to Gehreys Lane. As the Kilmore Creek is approximately 6.5 kilometres in length, the Master Plan has divided the study area into different sections to spatially display the actions and recommendations. The improvements proposed in the Kilmore Creek Precinct will strengthen the amenity and economic development in the Town Centre.

Methodology

The Master Plan has been informed through a site analysis, landscape character assessment and high-level desktop environmental conditions assessment. Key stakeholder engagement with agencies and community groups occurred early in the process to inform the draft Master Plan.

The draft Master Plan was placed on community consultation to help inform the document and identify the three (3) priority projects for implementation. This process is discussed in further detail under the Consultation subheading.

KILMORE CREEK PRECINCT LANDSCAPE MASTER PLAN (CONT.)

CONSULTATION

A Consultation Report has been prepared for this project, outlining the steps undertaken to inform the Landscape Master Plan and providing a detailed overview of the submissions and comments received. The consultation report is at Attachment 2.

Early consultation

Prior to community consultation of the draft Master Plan, targeted stakeholder engagement occurred with the Goulburn Broken Catchment Management Authority (GBCMA), Taungurung Land and Water Council Aboriginal Corporation (TLaWC), Kilmore and District Residents and Ratepayers Association (KADRRA), BEAM Mitchell Environment Group and the Kilmore Miniature Railway. Following these meetings, two joint site visits and walks along the Creek were undertaken with representatives from BEAM and the Mitchell Environment Advisory Committee, the Kilmore Miniature Railway, the TLaWC and Council officers.

Exhibition of the Draft Kilmore Creek Landscape Master Plan

The draft Master Plan was placed on exhibition from 6 September 2019 until 7 October 2019 in accordance with the *Mitchell Shire Community Engagement Framework 2018*. Exhibition comprised:

- Direct notification of relevant referral agencies, community groups (20) and affected landowners (30).
- An article in the North Central Review (3 September 2019).
- A project website was formed on Engaging Mitchell, recording 232 site visits and 181 document downloads during the exhibition period. 7 online surveys were completed.
- Hard copies of the documentation were made available at the Wallan Planning and Building Office and the Kilmore Library.
- Information sheet.
- A joint drop-in session with the Hudson Park Master Plan project was held on 19 September 2019 at the Kilmore Library. Approximately 45 people attended the session.

A focus of the exhibition process was to seek feedback on potential priority projects for Council implementation. The responses have been used to inform the three (3) identified priority projects discussed below.

Submission Review

A total of fifteen (15) submissions and seven (7) online surveys were received. Nine (9) of the submissions and all seven (7) online surveys are supportive of the plan, the other six (6) submissions sought changes or were unsupportive. The following key themes emerged from the submissions:

Trail – Better access to and along the Creek has been the main theme during consultation. Most people are supportive of the principle; however, people have different opinions on width of the trail and the preferred materials.

Weed eradication and rubbish removal – Many respondents have identified that the Creek needs “a clean-up”. Litter and rubbish from residents, but also non-native weeds or trees overgrowing the Creek should be removed to improve the “quality” of the Creek.

KILMORE CREEK PRECINCT LANDSCAPE MASTER PLAN (CONT.)

More trees should be planted – and they should be native – There is a lot of support for further tree planting in the Creek Corridor, to provide shade on hot summer days and improve the natural qualities of the Creek.

Taungurung Land and Waters Council (TLaWC)

The TLaWC have stated that the area should be protected from any development that would result in significant ground disturbance. In their submission they suggest to keep at least the public land areas of the creek untouched, with minimal ground disturbance, to preserve unique heritage that Taungurung Elders, as Traditional Owners, prefer to leave untouched, as they were left by their ancestors.

Kilmore Miniature Railway Extension

The Miniature Railway is well-established and forms part of the fabric of the community. Through the consultation process of the Landscape Master Plan, the volunteers of the Kilmore Miniature Railway have provided Council with a plan to extend their rail tracks north, into Hudson Park, and south, into Apex Park. The draft Master Plan displayed an extension into Hudson Park which only attracted a small amount of support and interest through the community consultation.

ISSUES AND DISCUSSION

Miniature Railway Inclusion

As part of the consultation process, a submission was received from the Taungurung which outlined their concerns in relation to the proposed extension to the miniature railway.

The submission reinforces the importance of the Kilmore Creek from a cultural perspective and also states the Kilmore Creek and its tributaries are areas of extreme sensitive for Taungurung cultural heritage.

As a result, the miniature railway proposal has been removed from the Master Plan.

Council is willing to further explore a future viable option in partnership with both parties should there be agreement about location, alignment and extent (if possible).

Priority Projects

Thorough the preparation of the plan, a number of themes were addressed, including feedback in relation to key projects and future works that could be undertaken to improve the creek corridor in the short to medium term.

The key priority projects are as follows:

A. Town Centre Creek Revegetation

Council and the landscape architects have identified which weeds (Willow trees) should be removed in the Creek and identified opportunities for revegetation between Mitchell Street and Bourke Street. This section has been chosen as it can provide a boost to the existing Town Centre.

A cost estimate of \$300,000 has been prepared, allowing for the removal of weeds, replanting of full-grown trees and undergrowth and maintenance for the first two years to ensure survival. The Master Plan supports undertaking these works in a

KILMORE CREEK PRECINCT LANDSCAPE MASTER PLAN (CONT.)

partnership approach with the GBCMA, community groups and any other interested stakeholders.

B. Creek Trail

Constructing a creek trail between Rutledge Street (the start of Sam de Gabriele Reserve) and Tootle Street. The project consists of a 3.0 metre wide concrete trail, 1,200 metres in length, two bridges and two boardwalks, road crossing treatments, wayfinding and interpretive signage, park furniture and lighting.

This area was chosen as it would address the lack of connectivity along the Creek south of Lumsden Street and would connect to residential areas in the south of Kilmore, including Natures Run and The Elms Estate.

A Cultural Heritage Management Plan (CHMP) will need to be prepared before works can commence. Council officers have prepared a funding application for this project at an estimated cost of \$2,500,000 for the 2020 Growing Suburbs Fund process, which was unsuccessful.

C. White Street Upgrade & Forecourt

A re-design for the car park north of the Leisure Centre has been prepared to address functional issues. The design aims to create more amenity and allow for more space for the creek trail by widening existing narrow sections. The project can be linked to the realignment of the miniature railway, a cultural heritage interpretation place in cooperation with the TLaWC and the introduction of a wetland to implement best practice Integrated Water Management principles, while also having the ability to deliver this project in isolation. This design is estimated to cost approximately \$1,500,000.

Additional information would be required prior to works commence to address matters of uncertainty surrounding the impact it might have on the ground disturbance, (native) vegetation, the stability of the Creek embankment, the ability to co-exist in a safe way with other users along the trail and within Hudson Park and the long term economic feasibility of the volunteer-run railway. Therefore, the extension of the Miniature Railway is no longer included in the Landscape Masterplan as it is proposed for endorsement.

FINANCIAL, RESOURCE AND ASSET MANAGEMENT IMPLICATIONS

The Landscape Master Plan has been completed within the budget allocated under the Government grant.

The implementation strategy will inform future Council budgets and possible external funding opportunities to deliver key projects within the plan area.

POLICY AND LEGISLATIVE IMPLICATIONS**Council Plan**

The proposed Master Plan is generally consistent with the strategic objective of responsible planning and the following key strategies within the Council Plan 2017-2021:

Strategic Objective: *To demand best practice outcomes when planning for future growth.*

KILMORE CREEK PRECINCT LANDSCAPE MASTER PLAN (CONT.)

Key Strategies: 3.1 – Plan for growth and change through best practice design of services, infrastructure, open space and recreation facilities.

3.3: Prioritise environmental and sustainability outcomes in planning decisions.

3.9: Improve the accessibility and connectivity of pedestrian and cycle paths within and between our towns.

3.10: Protect and enhance local ambience, amenity and character.

RISK IMPLICATIONS

Risk Ranking is determined using [ROHS201-G1- Corporate Risk Matrix](#). Risk is identified as Low, Medium, High or Very High

Risk	Risk Ranking	Proposed Treatments	Within Existing Resources?
Environment – Minor environmental damage restricted to immediate area.	Medium	Where it's proposed to use best practice methods, there is a risk remaining that works in and around the creek will cause minor environmental damage during construction.	Yes.
Financial – effect on operating budget. Likely to impact on budget or funded activities.	Medium	The Master Plan is ambitious, and the actions proposed would need to be delivered over time given current operating budget.	No.

SUSTAINABILITY IMPLICATIONS (SOCIAL AND ENVIRONMENTAL)

The Landscape Master Plan proposes to enhance the Kilmore Creek precinct and improve the social and environmental impacts of this open space corridor. When delivered, it will provide an improved natural environment and more opportunities for residents and visitors to use and enjoy the area.

CHARTER OF HUMAN RIGHTS IMPLICATIONS

The rights protected in the *Charter of Human Rights and Responsibilities Act 2006* were considered in preparing this report and it's determined that the subject matter does not raise any human rights issues.

CHILDREN AND YOUNG PEOPLE IMPLICATIONS

The provision of an open space corridor and improved connectivity will positively impact children and young people as more opportunities for safe active transport within Kilmore are provided given the Creek's alignment being in close proximity to community facilities and other key destinations.

OFFICER DECLARATION OF CONFLICT OF INTEREST

KILMORE CREEK PRECINCT LANDSCAPE MASTER PLAN (CONT.)

No officers involved in the preparation of this report have any direct or indirect interest in this matter.

CONCLUSION

The Kilmore Creek Precinct Landscape Master Plan provides a vision to guide future landscape improvements and land management practices. The Master Plan identifies three (3) priority projects for implementation, in addition to actions that will be implemented over time.

Following exhibition and the consideration of submissions which are generally supportive of the document, it is recommended that the Master Plan be endorsed.

Executive Summary

The purpose of the Kilmore Creek Precinct Landscape Master Plan project is to provide a plan for the future use of the Creek as open space for the community to enjoy and to improve the Creeks natural environment. The need to prepare a Landscape Master Plan is a key action identified within the Kilmore Structure Plan.

The Draft Landscape Masterplan involved a variety of consultation methods and approaches. This enabled Council to acquire a significant range of inputs, suggestions and comments from members of the Kilmore community.

The following key themes emerged during consultation:

- **Shared Path** – Better access to and along the Creek has been the main theme during consultation. Most people are supportive on the principle; however, people have different opinions on width of the path and the preferred materials.
- **Weed eradication and rubbish removal** – Many respondents have identified that the Creek need “a clean-up”. Litter and rubbish from residents, but also non-native weeds or trees overgrowing the Creek should be removed to improve the “quality” of the Creek. \
- **More trees should be planted – and they should be native!**

1. Introduction

Council has prepared a Draft Landscape Master Plan to highlight the importance of the Kilmore Creek. The Draft Plan outlines a vision for the creek to become the primary recreational open space for Kilmore. The Draft Plan aims to improve local shared path connections, guide public outdoor space improvements and manage the environment within land adjoining the creek.

Before the Draft Landscape Master Plan went out for community consultation, the following process has been undertaken to inform the Draft Plan: process involves the following stages:

May 2019 - Early consultation with GBCMA, Taungurung, KADDRA, BEAM, Miniature Railway.

June 2019 – Site visit with Environmental Groups (BEAM, MEAC) and Miniature Railway.

August 2019 – Site visit with Council Staff and Taungurung Clan representatives.

The draft Landscape Master Plan consists of three parts: A site Analysis and Assessment, Guiding Principles and General Actions and Recommendations. After that, the Creek is divided into seven sections, each with their own more detailed projects and descriptions.

2. Purpose

The purpose of this Consultation Report is to provide a summary of the community feedback received during the community consultation undertaken in September and October 2019. This community feedback was used to help shape the final Landscape Master Plan, helped with picking the Priority Projects and inform the (to be written) implementation plan.

3. Community Consultation on the Draft Landscape Master Plan

Consultation involved a variety of consultation methods and approaches. This enabled Council to acquire a significant range of inputs, suggestions and comments from all members of the local community. An extensive consultation exercise was undertaken to capture the view and opinions from a broad range of stakeholders and community groups.

Consultation Approaches:

Engaging Mitchell Project website

A project website (<https://engagingmitchellshire.com/kilmore-creek-masterplan>) was formed for interested stakeholders to be kept informed about the project, consultation and upcoming events. 232 site visits have been recorded and in total 181 documents have been downloaded by 94 of the visitors.

Online Surveys

The project website also provided the opportunity for interested stakeholders to complete a short survey. This primary research tool was easily accessible, and undertaken to explore the characteristics, behaviours, needs and expectations of the community.

The online surveys were not as popular as the website, only 7 people have filled in the survey and 2 people filled in their submission online.

Letters to stakeholders and landowners

Over twenty identified Community Stakeholders and over thirty potentially affected landowners received a letter and information sheet about the project, where they could get more information and how they could engage or submit to the proposed plans.

Most of these people have been in contact with Council, by visiting the drop-in session, putting in a submission or calling up the Council Officer for further information.

Drop in Session

On Thursday 19 September a joined drop in session was organised together with the Hudson Park Master Plan project, providing an opportunity for people to be informed and provide feedback on the Master Plan, and cast a vote on their preferred priority project.

It is estimated that approx. 45 community members have visited the Drop in Session that day.

Submissions

The Draft Landscape Masterplan has been on public exhibition at the Kilmore Library and the Wallan Planning and Building Office. People who have requested to see the documents, have been invited to put in a submission. 12 submissions have been received during the consultation period and 3 submissions have been received afterwards.

4. Key Findings

4.1 Drop in Session

At the drop-in session on Thursday 19 September, the Hudson Park Master Plan project recorded 31 names and contact details from Kilmore community members. With additional people who've only engaged for the Kilmore Creek project, it is estimated that we've engaged with approx. 45 community members.

Priority Projects votes

Visitors at the drop-in session have been invited to cast their vote on the proposed priority projects. With 102 stickers put up on the poster, it's estimate that 34 visitors cast their vote.

The project that clearly received the highest number of votes was project K: a Shared Path between Lumsden Street and Tootle Street.

Comments were made that the difference between weed eradication, significant tree planting and vegetation planting weren't clear to all participants, or that participants would like to see that happen in other locations then the proposed locations.

The full score of the votes on the poster was:

Potential Priority Project	Name	Number of votes
A	Cultural Heritage Management Plan (CHMP)	6
B	Weed eradication and Revegetation	12
C	Upgrade of wayfinding and identity signage	4
D	Shared Path (Union Street to Clarke Street)	9
K	Shared Path (Lumsden Street – Tootle Street)	20
G	Shared Path (Hudson Park / Leisure Centre)	5
H	Kilmore Miniature Railway extension	10
J	Shared Path Connection & Community Space (Sam de Gabrielle Reserve)	0
F	Community Space (Mill Street)	6
E	Public Toilet (Corner of Sydney Street and Union Street)	3
I	Public Toilet (Kilmore Leisure Centre and Kilmore Miniature Railway)	7
L	Significant tree planting (Lumsden Street to Tootle Street)	12
M	Vegetation Planting (Lumsden Street to Tootle Street)	8

Other comments made

Visitors where invited to leave other ideas or comments as well.

Each comment has been given an indication if it should be included in the Masterplan (✓), needs further discussion (~) or can be disregarded for this project (X):

	Wiki Camps Australia (the app). More features added for Tourists to draw them to Kilmore + Wallan
	Return private land to public ownership between creek + Andrew St. near Union Street.
	Make good use of creek behind shops. Also old quarry area could be beautiful.
	Don't built ultra-modern, reflect more of the heritage of the town when building along the creek.
	Former Quarry at Lamb Street = Kangaroo Grazing Area. Incorporate in plan.
	Quarry – utilise acoustics, music events, theatre, outdoor movies.
	Kilmore East Station Road from Northern Highway. Very Steep Hill & No Paths. Improve.
	Safety on Shared Paths!
	Shared path min. 10 meters wide.
	Build shared path using recycled materials.
	Construct a path / steps down from Ryans Road lookout to the Creek.
	More bike trails / shared pathways. Tallarook bike trail is great.
	Please remove old tramway tracks from Hudson Park. Very slippery + dangerous.
	Include the Sundial (Banella Style) of the Art Walk in the plan (near the Horse → Peter Appleton).
	Darebin Creek Trail. Good example of bike path.
	We need signage to walking tracks from main road to get visitors to stop in town.
	Better Entry sign entering Kilmore.
	Bridge construction continuation of Mitchell Street.
	Keep all the Car Parking in Patrick Street.
CFA	Risk of the Creek being a wedge through which fire can spread.
CFA	Breaks in vegetation. No continuity. Break in each section (20 / 25 m).
CFA	Clearing Project to be undertaken close to Willowmavin Road.
CFA	Fires have high impact on residents. Clean up the area (incl. Apex Park)
	Linear Australian Native Plants Garden. (Tootle Street → Wandong Road Rail corridor)

	Help with revegetation (106 Northern Highway). Reasonable sized plants → little ones won't survive dry seasons.
	Call the project Kilmore Creek Parklands.
	Weeds, wildlife, rubbish, public furniture.
	Mill Street: used to be really well used. Bad design and bad votes on the design.
	Create opportunities for community groups to be involved.

4.2 Submissions

Each submission has been documented and considered before finalising the Landscape Master Plan process. Up to Monday 7 October, 12 submissions were received. 3 submissions were received after the consultation period closed. In the table below the submissions are summarized and an indication has been provided as to whether or not to incorporate it into this Landscape Master Plan.

#	Submitter	Summary	Officer Response	Status
1.	Goulburn Valley Water	Sewer network augmentation works. Environmental Offsets project, downstream of the township of Kilmore. Stormwater management weed control and native revegetation are supported.	No action required for the Landscape Master Plan.	Resolved.
2.	Chris Kalamoshkos (111 Northern Highway)	Plant more trees. Anything native. Look into the water quality. Get in touch with the industrial landowners. Don't build a shared path at the back of my property.	Supportive of the Landscape Master Plan.	Resolved.
3.	RC Plaster (35 Willowmavin Road)	Supportive and want to discuss a fence along their site.	Supportive of the Landscape Master Plan.	Resolved.
4.	MEAC	Include hydration points (every 500 m). Include walkways under bridges at Union and Rutledge. Phased removal of exotics and replacement with natives.	In general, supportive of the Landscape Master Plan.	Partly resolved.

		<p>Toilets near Tootle street end. Permeable surfaces for paths. General lack of parking. Environmental and cultural asset maps should be the basis. Engage with adjoining landowners.</p>	<p>Disagree with the number of hydration points proposed, permeable surfaces for the shared path and providing more car parking within the Creek corridor.</p>	
5.	Mitchell Bushwalking Group	<p>Mow the grass, manage and maintain the creek. Bins help against rubbish. We need rubbish clean ups.</p>	<p>Supportive of the Landscape Master Plan.</p>	Resolved.
6.	Maureen Murphy	<p>Clean up the Creek: eradicate weeds and other useless growth. Look at stormwater pipes feeding into the creek. List all tree types growing and eradicate all "nuisance" trees. All "human" rubbish should be removed. Council should fund all this work immediately.</p>	<p>Supportive of the Landscape Master Plan. Disagree with the suggestion that Council should fund all this work immediately, budgets do not allow for that.</p>	Resolved.
7.	Craig Gifford	<p>Why isn't the full Eastern Tributary (up to Willowmavin Road) included</p>	<p>The eastern tributary is partly included after June, as an extension of the original scope of works. The tributary further south is all in private ownership and will be part of a future Development Plan. The Landscape Masterplan outlines</p>	Unresolved.

			<p>principles that also apply to this tributary.</p> <p>The available budget and timeframes do not allow for a full design of the full eastern (or western) tributary.</p>	
8.	Bev McLennan	<p>Place rubbish bins along the footpath.</p> <p>Clean up the creek (bulrushes)</p>	<p>Supportive of the Landscape Master Plan</p>	Resolved.
9.	DELWP	<p>Take the Native Title Act and Traditional Owners Settlement act taken into consideration when constructing something.</p> <p>DELWP recommends all Crown land impacted to be transferred to Mitchell Shire for future management.</p> <p>Improved biodiversity outcomes are supported.</p> <p>ESO3 applies to much off the land.</p> <p>Address that when undertake projects.</p> <p>DEWLP commends the Shire and the plan.</p>	<p>Supportive of the Landscape Master Plan.</p> <p>Becoming Committee of management provides a big opportunity.</p> <p>However, financial implications (maintenance costs), existing encroachment issues and safety on the land around the Quarry need further investigation.</p>	Resolved.
10.	Kilmore Miniature Railway	<p>Concern over track alignment near edge of Creek.</p> <p>How much space between railway track and proposed Shared path.</p> <p>Bylands Tramways track should not be removed and should not be incorporated into concrete path.</p> <p>3-Meter-wide path will ruin aesthetics of the area.</p>	<p>Officers are not supportive of an extension south into Apex Park. The purpose of an extension is to be more visible for the public, which will not be obtained by going south.</p>	Unresolved.

		<p>No mention of Miniature Railway extension into Rutledge street. Pipe planned to be used as a tunnel for miniature railway. No deciduous trees. Welcome a toilet at the Kilmore Leisure Centre. Art walk Paving is supposed to be the turning point. Bridge widening might alter track configuration. Alternative: Use bridge at end of Skehan Place Alternative alignment further south. Fencing was a condition of Mitchell Shire for public safety.</p>	<p>The priority is to construct a shared path that is usable for everyone, all days of the year. Miniature Railway needs to be able to co-exist with that objective.</p>	
11.	John Le Quiniat	<p>Path should be pedestrian use only. Path should be gravel only. Not Concrete.</p>	<p>Goal is to provide pedestrian only paths on one side and shared path on the other. Where it's not possible to double up, we prefer a shared path as it will allow for a safe connection for all users.</p>	Unresolved.
12.	Craig Gifford	<p>Eastern tributary should be more protected! Heavily treed on private property.</p>	<p>See response #7.</p>	Unresolved.
13.	KADDRA	<p>Concrete path is undesirable. 3 meter wide path encourage speeding cyclists, skate boarders and blade runners. Council to purchase industrial land north of Clarke Street.</p>	<p>The priority is to construct a shared path that is usable for everyone, including cyclists and prams.</p>	Unresolved.

		<p>Playground South of Leisure Centre. Indigenous vegetation supported. Miniature railway to be extended both north and south. Toilet block near Union Street.</p>	<p>Council budget does not allow for purchase of land.</p> <p>Land south of Leisure Centre is good locating for wetland to improve water quality from tributary. Will investigate opportunity to include some play equipment into the design.</p>	
14.	GBCMA	<p>Council’s Vision for Kilmore Creek is inspiring and appropriate to the Commuting Hills SES. The guiding principles to protect and enhance ecological values while improving community access and amenity in the urban setting sound great and are endeavours the GBCMA would like to foster.</p>	<p>Supportive of the Landscape Master Plan</p>	<p>Resolved.</p>
15.	TLaWC	<p>TLaWC is of the opinion that the area should be protected from any development that would result in significant ground disturbance. Taungurung would like to try and keep at least the public land areas of the creek untouched, with minimum ground disturbance, to preserve unique heritage left by Taungurung Ancestors.</p>	<p>Remove (significant) ground disturbing activities from the Creek corridor plan.</p>	<p>Partly resolved.</p>

The responses from the submissions are not consistent. Nine submissions are supportive, six submissions are (partly) unresponsive on the proposed Draft Landscape Masterplan.

Opinions differ especially on the material (and width) of the path and the extension of the Miniature Railway.

4.3 Online Surveys

A short online survey was administered to seek the views and opinions of the local community in Kilmore. A total of 7 surveys were completed and these are the results.

1.	Andrena	A 2.5km continuous path which doesn't cross any roads would be great to run an event like parkrun in Kilmore.	Shared Path from Union to the Leisure Centre. Shared Path from Leisure Centre to Lumsden Street. Shared path from Lumsden Street to Tootle Street
2.	Anne Laver	Spotted platypus along the creek near the back of the shops Plant indigenous plants. Wide paths for pedestrians and cyclists.	Weed Eradication and Revegetation Shared path from Lumsden Street to Tootle Street
3.	Elisinda Mayo	Proper walking path along Union St for students to have a safe access to the bus stop, tennis and football club. Kilmore 's creek is barely visible right now, there's not a proper signalised access or path. It would be great to have a bike/walking path all along the creek, and/or a picnic area next to it.	Shared path from Clarke Street to Union Street Shared path from Union Street to the Leisure Centre

4.	John Thexton	Gravel path is better with the character of a creek. Extend miniature Railway South as well.	Consistent wayfinding and identify signage Extend the Kilmore Miniature Railway Public toilet near the Leisure Centre
5.	Michelle Z.	Ensure the path is looped to return so we can run a 5km parkrun.	Shared path from Union Street to the Leisure Centre Extend the Kilmore Miniature Railway Shared path from Lumsden Street to Tootle Street.
6.	Anthony Archer.	Fire Safety is a big concern.	Weed Eradication and Revegetation Other (please list)
7.	Stewart Furniss	The creek looks terrible in places, lacks natural vegetation/ plants & is covered in weeds. The paths aren't wheel chair/pram friendly or very accessible for the elderly.	Weed Eradication and Revegetation Extend the Kilmore Miniature Railway Shared paths everywhere!

5. Next Steps

Council has finalised the Landscape Master Plan and will incorporate comments made by the community. Council Officers are of the opinion that the material and width of the path should remain as proposed, and the extension of the Miniature Railway is no longer shown on the plans.

In the Council resolution to endorse the Landscape Master Plan, three priority projects will be proposed to be further designed and funded. Those designs, among with other cost estimates, will inform the Implementation Plan for the Kilmore Creek Masterplan.
