Create an amazing time travel watch!

You will need:

> White paper or thin card (card works best if you have it)

> Crayons, pencils or textas

> Scissors (check with an adult that it's okay for you to use these)

> A glue stick

> a split pin or brad

Optional: you can also use glitter or other decorations to bling your watch up

1. If you have a printer, print off our template onto thin card if you have it or paper if you don't. You could even draw your own pieces if you prefer
2. Colour in and decorate your watch template pieces. Remember that the face is going to be underneath the dial so don't use glitter on it – but you can be as creative as you want when you decorate your dial.
3. If you want, you could design your own watch face instead – think of some exciting times or places that you would love to visit!

4. Cut out the face, but instead of using our template, just use the back - that way it'll fit nicely onto the watch later

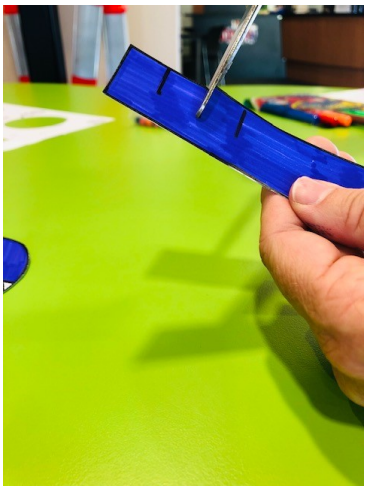

Figure 1 Don't forget to cut along the inner lines of the watch band

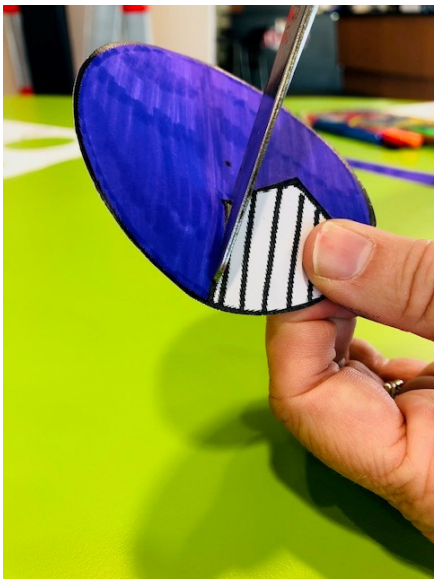
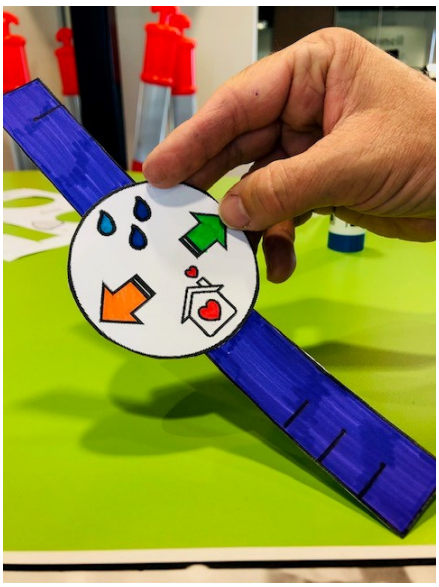
Just remember that your pictures will need to fit within the cut out section of the dial or you mightn't see them properly (who knows where you could end up then!)

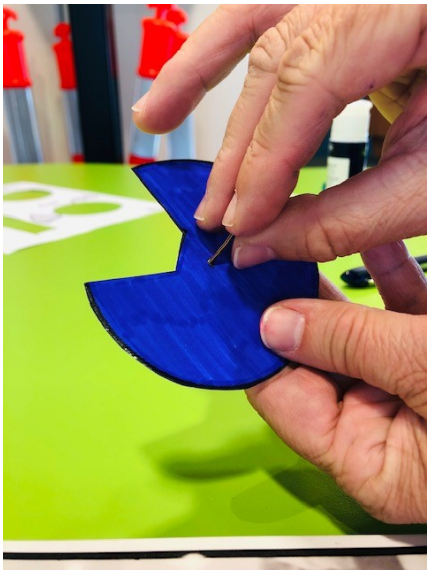
5. Cut out all your watch pieces (remember to check with a grown up before using scissors). When you cut



out your watch band, don't forget to cut along the inner markings as you will use these to fasten it to your wrist later

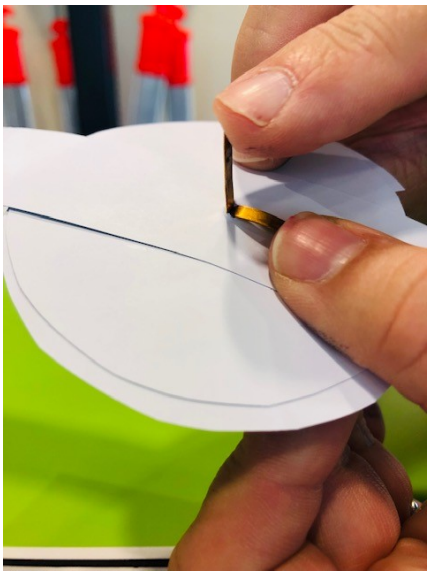
6. Glue the face onto the centre of the band

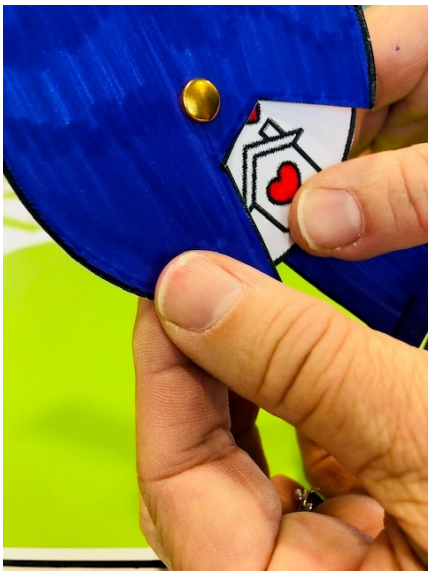




7. Place dial on top, using a split pin/brad to secure through the band and face but allow it to spin around so you can turn to select where to visit

> **Tip:** Use a pen nib to pre-pierce the hole for the split pin





8. Fasten your band and take it for a spin! Press the split pin to activate.
9. Don’t forget to report back to us on your travels!
